AMPLATZER™ Multi-Fenestrated Septal Occluder – “Cribriform”

Atrial Septal Defect Closure

The AMPLATZER Multi-Fenestrated Septal Occluder – “Cribriform” is a self-expanding, double-disc device designed for closure of multi-fenestrated atrial septal defects.

Product Highlights

- Matched disc diameters maximize coverage of multiple fenestrations
- Device can be easily recaptured and redeployed for optimal placement
- Nitinol and interwoven polyester promote occlusion and tissue in-growth
