MORE CONTROL. LESS RISK.

AMPLATZER™ Duct Occluder

Patent Ductus Arteriosus Closure

The AMPLATZER Duct Occluder (ADO) is a self-expanding device designed for closure of patent ductus arteriosus. The ADO is designed to accommodate large PDAs with a single device—which may reduce the complexity of the procedure.

Product Highlights

- Retention skirt built to provide secure positioning within the ductus and reduce embolization
- Device can be easily recaptured and redeployed for optimal placement
- Nitinol and interwoven polyester promote occlusion and tissue in-growth
- 98.4% closure at 6 months³

Ordering Information

Contents: 1 occluder

Model/Reorder Number	Device Diameter at Descending Aorta (mm) [A]	Device Diameter at Pulmonary Artery (mm) [B]	Retention Skirt Diameter (mm) [C]	Device Length (mm) [D]	Minimum Recommended Sheath Size*
